

GAS WATCH 240.

The official, signed offer from AGL & SANTOS –

“Any Landholder is at liberty to say “yes” or “no” to the conduct of CSG Operations on their land.”

URGENT ACTION NOW REQUIRED BY YOU TO SAVE YOUR LAND.

A draft letter is attached for you to use. Just add your name and property address and send it to AGL and also to Santos, the signatories to the Agreement.

To protect your land you should immediately write to AGL and Santos informing them that you elect not to have them on your land.

All Landholders, should send a letter, whether their land is in an AGL Petroleum Exploration Licence area, a Santos PEL area or in no PEL area at all. Why? PELs can be transferred between explorers and PELs can be issued over your land at any time without your consent and without you even knowing it is being issued until it is done.

Let the Coal Seam Methane Gas miners know exactly where they will not be able to drill for Coal Seam Methane gas so they can plan their futures.
