

# **GAS WATCH 55.**

## **SYDNEY GAS REMOVES THE WORD “METHANE” FROM ITS WEBSITE.**

A crawl through the Sydney Gas website will reveal that Sydney Gas has removed any reference to “methane”. No longer do they call this toxic gas “methane”. Of course this is out of step with other methane gas miners around the world. Typical of the Sydney Gas spin doctors.

### **AND WHY WOULD THEY DO THAT ??**

Because **METHANE GAS**:

- × Is highly explosive;
- × Will suffocate humans if builds up in their homes;
- × Is just another fossil fuel, and the regulation of its extraction and use has not been adequately addressed by Government;
- × When disturbed, migrates through the ground, contaminating ground water, affecting rivers, streams, brooks, waterways, wells and bores;
- × Is more than 20 times more active as a global warming gas than Carbon Dioxide;
- × When, burnt, belches Carbon Dioxide into the atmosphere at a rate of nearly 60% of that from burning coal;
- × Rapidly increases global warming;
- × Contaminates, sterilises and destroys soil and vegetation when it migrates;
- × Is extremely dangerous and the exploration and extraction will completely change the way of rural living, as we know and enjoy it now.

**Sydney Gas is attempting to make its invasion of the Broke village sound less menacing. But whatever spin they try to put on it, menacing it remains.**

**And they still won't agree to an Environmental Assessment of their immediate proposals.**

**IF SYDNEY GAS KNOCK ON YOUR DOOR, SAY “NO” – “WE DON'T WANT THEM ERECTING WELLS IN OUR VALLEY FOR ANY REASON”.**

**Free legal advice is available in relation to any proposals put to you by Sydney Gas.**
